

Parental Control DETAILED

Five Areas to Flee

Adapted from Rick Warren's Ten Commandments for Moral Purity.

1 Cor 6:18 Flee ... Phil 3:3 Put no confidence in the flesh.

1. Do not **visit**, date, counsel or do business with the opposite sex **alone** at home or in a lonely place or alone on a trip.
2. Do not counsel or discuss marriage problems with the opposite sex without that person's spouse present. Refer them to those who are trained.
3. Be careful in answering cards and letters from the opposite sex.
4. **FLEE** from **situations** that subtly deposit wrong values: filthy websites, novels and movies.
5. **FLEE** from anything that can **distract** your high **calling** and rob you of your **great inheritance**.

Prov 24:27
Finish your outdoor work. *NIV*

2 Cor 6:14
Do not be unequally yoked. *NKJV*

Setting up Parental Controls on the Net

Summary

iPad / iPhone - using Safari with Safe Tube App:

To enable restrictions on iPad / iPhone for Safari:

Settings → General → Go through the options to restrict movies etc → Restrictions → Enable Restrictions with pincode. Set *Limit Adult Content* → Never Allow: m.youtube.com. Installing Apps/In-App Purchases: *OFF*. You may unblock any web page that is wrongly restricted with pincode. Keep the pincode with **you** only and **not** your **children**. Regularly check the **history**.

To use YouTube – Safe Tube App

Apple App Store → Search: YouTube *Safe* (by EC Productions Ltd.) → *Install (99 cents)*
Open App → Manage Passcode → Enter Passcode → Save → Enable Passcode Lock

iPad / iPhone – Using Mobicip, deactivating Safari.

To Block Safari

Go to iPad Settings → General → Restrictions → OFF Safari

Installing Mobicip Safe Browser:

Apple Store → Search: *Mobicip Safe Browser* → *Install*. Open Mobicip and Login with *Email & Password*.
Change Filter Level, refer **Android** steps below.

To open links in other Apps (i.e. Email):

Hold on links → Copy → Paste in Browser

Android – Using Mobicip

To use Safe Browser:

Google PlayStore → Search: *Mobicip Safe Browser* → *Install*. Open Mobicip and Login with *Email & Password* → Enter Mobicip Passcode – 4 digits

To change Filter Level:

Go to Mobicip Website @ www.mobicip.com → Login with *Email & Password* → *Edit* current profile / *Add Profile* → *Tick* and *Logout*.

Windows Live Family Safety (Windows PC)

To create User Accounts and activate Parental Controls:

Install Windows Live Essentials <http://windows.microsoft.com/en-my/windows-live/essentials>. Control Panel → User Accounts → Create a password. User Accounts → Manage another account → Create new Standard User. Parental Controls → *Select* new account created → Sign-in with *Email & Password* → Check *Monitor Account* on new account → *Select Family Safety Member* → *Save*.

To change Filter Level:

Go to <http://familysafety.microsoft.com> → sign-in with *Email & Password*. Click: *Primary Parent* → *Web Filtering* → *ON* → *Select using slider* (Allow till “Online Communication”) → Sign-out. Unblock any webpage that is wrongly restricted (Web Filtering: Allow or block list).

Apple Mac OSX

To create User Accounts activate Parental Controls:

System Preferences → Parental Controls → Create a new user account with parental controls: Enter *Name* and Password. Parental Controls → Apps: Limit Applications; Web: Try to limit access to adult websites automatically → Exit. Unblock any web page that is wrongly restricted (Web: Customize).

Keep the passwords with you and not your children. Regularly check the history.

Do give us feedback on how to improve the Setting up Parental Controls. Do let us know of any latest and better Application that is faster and more effective! Email: rlc@oasisofcare.org
